

REMARKS

Claims 1-25 are pending and under consideration.

The rejections based on KR '409 and KR '188 are respectfully traversed.

It was previously argued that these references do not disclose a first supporter having a non-cylindrical cross section, a second supporter having a non-cylindrical cross section, a first insertion limiting part having a diameter greater than that of the first engaging shaft and the first supporting shaft, and the first engaging shaft has a polygonal cross section.

The Examiner responds by stating that these features do not solve any stated problem and the invention would perform particularly well. However, these features achieve several advantages as compared to the cited references.

The Examiner's attention is drawn to present Fig. 3. Since the first supporter 29 has a non-cylindrical cross section, a better fit is achieved between the first supporter 29 and the holder 27. This better fit is particularly realized during rotation. The polygonal cross section of the first engaging shaft 29a allows the first engaging shaft 29a to move with the first accommodator 25a without slipping. In contrast, if the first engaging shaft 29a and the first accommodator 25a were both circular, it would be possible for these elements to move relative to each other during rotation.

With respect to the first insertion limiting part 29c having the greater diameter, this prevents axial slipping between the first supporter 29 and the holder 27.

Due to these advantages, it is respectfully submitted that the claimed invention is not obvious in light of the cited references.

Accordingly, withdrawal of the rejections is requested.

There being no further outstanding objections or rejections, it is submitted that the application is in condition for allowance. An early action to that effect is courteously solicited.

Finally, if there are any formal matters remaining after this response, the Examiner is requested to telephone the undersigned to attend to these matters.

Serial No. 10/805,339

If there are any additional fees associated with filing of this Amendment, please charge the same to our Deposit Account No. 19-3935.

Respectfully submitted,

STAAS & HALSEY LLP
